

Runner Manager Ideation

Centralizing fleet management

Real-time map dashboard with:

- Runner avatars + statuses (Available, Picking up, En route, Idle)
- Color-coded order icons by urgency

Table view with delivery status, ETA, and runner info side-by-side

Automate task assignment

Smart delivery dispatch engine that recommends top 3 runners per order based on live data

Manual override + assign flow with filters (distance, delivery load, past rating)

Surface delay alerts

Alert feed with:

- Runner name
- Problem reason
- Suggested next action

- Red/amber/green tags for each delivery on map and dashboard

Unify communications channels

In-app messaging center to chat with all active runners

Push notifications + message log (sent/received)

Generate performance insights

End-of-day dashboard:

- Completed deliveries
- Delays + causes
- Runner performance stats

Downloadable reports per shift/week (PDF or spreadsheet)
