

Runner Ideation

Optimize route assignments

Smart route assignment system that uses:

- Runner's current location
- Delivery distance
- Time since last delivery (to balance workload)

Accept or Reject Delivery" preview with ETA and distance shown before accepting.

Simplify communications

In-app chat with manager & customer (like Uber Eats)

Emergency call button + predefined quick messages (e.g. "Can't find address")

Task Clarity

Order summary screen with:

- Clear customer name + contact
- Map pin + address
- Special instructions (condiments, cutlery, call first)

Voice-read instructions feature

Preview Upcoming tasks

Multi-order queue view with estimated drop-off times

Heat map of nearby deliveries to suggest optimal next order

Enable Realtime updates

"One-Tap Delay Report" → Quick options like:

- Stuck in traffic
- Restaurant is slow
- Customer unreachable

Auto-alert to customer & manager when GPS detects delay (+5 mins from ETA)
