

Runner Persona card

Beatrice Ouma

Age: 34
Job Title: Runner Operations Manager
Experience: 2 years
Location: Nairobi
Devices Used: Android smartphone, Desktop

Tool usage

Tool	Frequency	Purpose
Delivery Admin Portal (Core)	Daily	Assigning deliveries, tracking runners
Google Sheets / Excel	Often	Shift planning, backup reporting
WhatsApp Groups	Often	Managing runner communication
Phone calls	Daily	Handling emergencies or late responses
Browser tabs (Google Maps)	Often	Verifying location or distance manually

User story

As a manager, I want to see where all my runners are and assign tasks smartly, so I can handle problems before customers start complaining.

Goals

- Monitor runner performance in real time
- Reduce delivery delays and customer complaints
- Assign tasks efficiently without confusion

Needs

- Real-time runner tracking
- Central dashboard with live order statuses
- Alerts when deliveries are delayed
- Flexible way to reassign orders fast

Wants

- A map that shows all runners with task statuses
- Ability to bulk message runners in-app
- A log of past delivery issues for reporting

Fears

- A delivery mess-up going unnoticed until the customer complains
- Losing track of who has which order
- Runners going offline without notice
