

TITLE

Runner Journey Map

PERSONA

SCENARIO

I have received an order and it needs to be delivered before certain time. I need to find the easiest way to deliver and get there on time and with the right order.

GOALS & EXPECTATIONS

- Deliver orders quickly and efficiently
- Complete more deliveries per shift to earn more
- Maintain good customer rating

Phase 1

1. Gets notified of a new delivery
2. Checks delivery details
3. Heads to the restaurant

Phase 2

4. Picks up the food
5. Drives to the customer

Phase 3

6. Arrives and delivers
7. Confirms delivery

USER THOUGHTS

Where am I going at this time?

I hope there are clear instructions

Is the route clear

Was this the right order

I hope I am not late

I hope they are home

Done, what next?

PAINS

- Route may be far or unclear
- Notes or contact details sometimes missing
- Map not loading or traffic not considered

- Mislabeled packages or unclear pickup directions
- Can't update customer/manager during delays

- App may lag or crash
- Customer unclear or unreachable

OPPORTUNITIES

- Auto-assign deliveries based on location + workload
- Require customers to complete address + contact field before confirming
- Add real-time traffic data + optimized route suggestions

- Show order number clearly, include pickup notes (e.g. "ask for James")
- Add quick-status updates or traffic alerts with 1 tap

- Add call/chat shortcut from delivery screen
- Improve performance and preload next order
