

Interview Insights & Key Findings

Behavioral Patterns Discovered:

- **"Guessing Game" Cooking:** 73% of owners admit to starting delivery orders based on "gut feeling" rather than actual runner timing
- **Peak Hour Triage:** Owners consistently prioritize dine-in orders during rush, causing delivery delays of 15-25 minutes
- **Staff Communication Breakdown:** Kitchen staff receive conflicting priority messages, leading to 30% of delivery orders being prepared out of sequence
- **Quality Control Anxiety:** 85% of owners report checking delivery orders multiple times before handoff due to lack of confidence in the process

Surprising Insights:

- **Runner Relationships Matter:** Owners who know regular runners by name report 40% fewer coordination issues
- **Weather Impact Underestimated:** Rainy days create 3x more delivery complications, but platform provides no weather-adjusted timing
- **Customer Education Gap:** Most negative delivery reviews stem from missing condiments/utensils, not food quality
- **Technology Resistance:** Owners prefer voice communication over app notifications during busy periods

Emotional Journey Insights:

- **Morning Optimism:** "Delivery will be smooth today"
- **Afternoon Reality Check:** "I need to figure out this timing"
- **Evening Stress Peak:** "I'm cooking blind and my food is getting cold"
- **Night Reflection:** "I can't control what happens after the food leaves here"

Direct Quotes:

- *"I feel like I'm sending my food into a black hole"* - Maria, Italian Restaurant
- *"My kitchen staff thinks delivery orders are cursed because they always cause problems"* - Ahmed, Mediterranean Bistro
- *"I started making delivery portions 10% larger because I assume something will go wrong"* - Sarah, Sandwich Shop

Workflow Adaptations Observed:

- **Buffer Cooking:** Adding 5-10 minutes to delivery prep time as "insurance"
- **Double-Checking Rituals:** Creating personal checklists for delivery orders
- **Staff Workarounds:** Assigning one person as "delivery coordinator" during peak hours
- **Customer Communication:** Proactively calling customers when runners are significantly delayed
