

Runner Persona card

Kelvin Otieno

Age: 27
Job Title: Food Delivery Runner
Experience: 1.5 years
Location: Kisumu
Devices Used: Android smartphone

User story

As a runner, I want a fair system that tells me exactly where to go and what to do so I can deliver faster without getting blamed for things out of my control.

Goals

- Deliver orders quickly and accurately
- Complete more deliveries per shift to earn more
- Maintain a good customer rating

Needs

- Clear, reliable route instructions
- Immediate access to customer notes
- Real-time delivery updates
- A way to report problems without calling

Wants

- Ability to plan ahead with visibility of upcoming deliveries
- Built-in chat to reach the manager without switching apps
- Directions optimized for traffic

Fears

- Being late and getting a bad rating
- Receiving a complicated delivery with unclear instructions
- Losing income due to poor route allocation

Tool usage

Tool	Frequency	Purpose
Delivery App (Core)	Daily	Task management, routes, delivery status
Google Maps	Daily	Navigation
WhatsApp	Often	Communicating with manager
Phone calls	Sometimes	When app chat fails or urgent issues arise
Pen & notebook	Seldom	Jotting down tricky addresses when app fails
