

DeliverNow Runner Interview Insights

1. Route assignment feels unfair(Jacob, Kinyua, Martin)

👉 Route assignments aren't optimized — some get far or difficult deliveries while others stay closer, leading to frustration

2. Instructions sometimes incomplete(Brian, Martin)

👉 Customer notes or special instructions don't always show up clearly, which causes mistakes or complaints.

3. Lack of visibility during delays(Jacob, Martin, Otieno)

👉 Runners feel helpless during delays (e.g. traffic) because they can't easily update managers or customers, leading to unnecessary calls and stress.

4. Communication with managers is slow(Jacob, Brian, Otieno, Kinyua, Phillip)

👉 Switching between apps (e.g. to Whats App) makes it harder to stay focused and communicate quickly. Runners want integrated chat.

5. Desire for multi-order visibility(Phillip, Otieno)

👉 Runners would like to see more than one order at a time to plan routes better and reduce inefficiency (e.g. fuel, time).
